

McKinney ISD Elementary School

Project Overview

The McKinney Sustainable Elementary School Project incorporates many environmentally friendly design principles, including rainwater collection, daylighting, wind energy, solar energy, geothermal heating and cooling, and the use of recycled building materials. The Raleigh, North Carolina–based Innovative Design and EBN’s Nadav Malin were environmental consultants on this project.

Location:

McKinney Texas

United States

Project Owner:

McKinney Independent School District

Submitting Architect:

SHW Group Inc.
